

K-0200 | Pruning shears

Pruning shears with ratchet system, high carbon steel and teflon coated upper blade to reduce gumming. The ratchet system is a ratchet design to help power through and cut up to 1" material. Light weight, durable, aluminium handle with a simple lock design. The gear powered design is also great for cutting plastic irrigation and line and pex plumbing pipe. As an extra feature, these scissors have an oil sponge with which the blade can be greased again after cleaning. This prevents corrosion.
